

Drive Buddy Interview Project

Write an application for input of drivers:

- Use [Node.js](#)
- Implement REST API with functionality to CRUD drivers
- Drivers will have the following fields: name, email, score
- Write a README file about how to use your app
- Bonus: unit tests

The deadline is 7 days starting from now. Please reply to this email when you finished the project.

Properly version-controlling your code is required. Please use a repository to version-control your code and share this repository with us. You can use Github, Bitbucket, Gitlab,...

Project deadline is up to 7 days but we encourage you to start early and get feedback, ask questions about the project.
